

# EN CA NTO

The Power of Cartilage. The Power of You.

---

ENCANTO PROJECT

A new era in  
**osteoarthritis treatment**

- **21 partners**
- **10 countries**
- **Regenerative medicine**
- **Knee cartilage repair**

**Learn how  
science**

is reshaping  
osteoarthritis care.

**What is ENCANTO?**

ENCANTO is a European research project developing a revolutionary therapy to treat **patellofemoral osteoarthritis (PFOA)** using a patient's own **nasal cartilage cells**, engineered into a therapeutic implant.

Nasal cells. Engineered

**Project Duration**  
2024-2029

# Why It Matters:

Current treatments can relieve pain but don't repair the underlying damage.

ENCANTO aims to reverse that —by rebuilding cartilage and restoring healthy movement.

# Who's Involved?

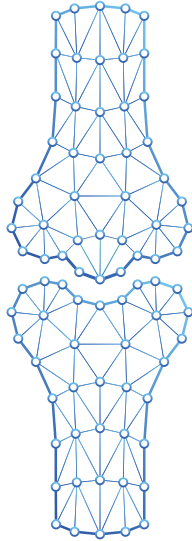

The project unites **21 partners** from **10 European** countries, including clinical centers, researchers, and biotech innovators.

tissue. Regenerated joints.
